top story

HP's latest Omnibook:
xt 6050

A member of HP's essential line of notebook PCs, the HP Omnibook xt6050 combines outstanding portability with the latest in mobile technologies to keep you in business - both on and off the road. The Mobile Intel® Pentium® III Processor-M or Mobile Intel Celeron™ processor and super-fast Intel graphics assure you of high performance, while an exceptionally flexible, expandable design guarantees that this notebook PC will keep up with your changing business needs.

The new HP Omnibook xt 6050 is based on the successful design of the 6000 and 6100 series, but in a lighter flavour. This gives positive consequences on its price setting. This new Omnibook is situated in HP's essential notebook line, which makes it a perfect fit for Small and Medium Business.

And just like the xe3, the HP Omnibook xt 6050 doesn't offer corporate stability. Nevertheless the modular concept of the machine allows the use of the media modules that are used by the Omnibooks of the professional line.

Some further highlights of the HP Omnibook xt 6050:

Outstanding portability for any-time, anywhere computing
weight starts at 2.2 kilograms and it's as little as 36 millimeters thin work uninterrupted, with up to four hours of battery life skip the bottlenecks, with system memory up to 1024 MB.

Flexibility and ease of use
Choose from a wide variety of hot-swappable modules: CD-ROM, DVD-ROM, CD-RW, combo DVD-ROM/CD-RW, second hard disk, 250-MB Zip, LS-240, and floppy disk drive.
Simplify your computing experience, with four, user-programmable quick-launch keys for automatic presentation setup, Web access, and more.

Like all HP Omnibook notebook PCs, the HP Omnibook xt6050 delivers:

- reliability
- security
- stability
- anytime, anywhere support

Setting a new standard for
mainstream PC technology

In January, HP introduced Special Edition PCs in Belgium and the rest of Europe. This allowed us to renegotiate agreements with component suppliers. Today TopValue proudly presents the new HP Vectra v1420 Special Edition PC with

- 1.8GHz processor instead of 1.6GHz
- 256MB instead of 128MB & 40GB 7200rpm disk instead of 20GB 5400 rpm
- 32MB graphics card instead of 16MB at only 130 EUR extra cost.

promo

hp vectra v1420 special edition

- P4-1.8 GHz processor
- 256MB and 40GB 7200 rpm disk
- ATIRage 128 Ultra 32MB graphics card
- WinXPPro
- free 17" CRT monitor

1.250 EUR
