NetXpress™ Thin Workstations

NetXpress offers the solid-state performance and flexibility needed in today's network computing installations. With NetXpress, you can right-size each workstation and provide the best combination of locally embedded and server-based applications to meet user-specific requirements while enabling centralized desktop management.

Rapport™ Administrative Software

Rapport Administrative Software is the ultimate Netier thin-client network management tool. And Rapport also lets administrators manage ICA and RDP Client software settings on non-Netier desktops running Windows 95® or Windows NT® 4.0 Workstation!

Citrix® Device Services

Netier offers Citrix® Device Services software, giving end users a valuable set of ICA® features independent of WinFrame® and MetaFrame™. *CDS comes free of charge with every Netier NetXpress™ thin client.*
