Vendor Program Overview

DataCore SANmelody overcomes the high cost barrier and complexity of traditional SAN storage. SANmelody converts standard Intel/AMD servers, blades or virtual machines (VMs) into fully capable storage servers that virtualize disks and serve them over existing networks to application servers. They are simple to operate, take only minutes to install, and let you cost-effectively optimize, manage and protect data storage and disk space. SANSymphony™ software is an enterprise-class open storage networking platform that maximizes the value from IT assets and boosts business productivity. Customers receive enduring ROI benefits from the comprehensive storage management services provided by the software.
