

HOW WOULD YOU LIKE TO INCREASE YOUR REVENUE ON SYMANTEC ENDPOINT PROTECTION OPPORTUNITIES?

SYMANTEC ENDPOINT PROTECTION UPSELL OPTIONS

Symantec Protection Suite Enterprise Edition

Complete your endpoint protection by filtering and blocking email and Web threats. Symantec Protection Suite Enterprise Edition delivers multi-layered security leveraging one of the largest global security intelligence networks.

Symantec Critical System Protection

Leading organizations leverage Symantec Critical System Protection to proactively safeguard server environments. Delivering host-based intrusion detection and intrusion prevention capabilities, Symantec Critical System Protection provides a proven and comprehensive solution for server security.

Symantec Network Access Control

Symantec Network Access Control allows your customers to securely control access to their networks, enforces endpoint security policy, and integrates with all existing network infrastructures. Available in all Symantec license programs, it uses the same agent as Symantec™ Endpoint Protection 12.1.2. Network Access Control is a perfect add-on to Symantec Endpoint Protection.
