Vendor Program Overview

Shavlik, a global leader in simplifying the complexity of IT management, is dedicated to significantly reducing the time-to-value for IT professionals from months to minutes. Shavlik's Protect, Patch for Microsoft System Center and Management Intelligence are some of its on-premise and cloud base solutions that enable customers to manage both physical and virtual machines, deploy software, discover assets, simplify configuration, control power usage and ensure endpoint security. By bringing the sophisticated capabilities enjoyed by large companies to organizations of all sizes and types, Shavlik is driving the democratization of IT..

Key Products

Shavlik Protect - Shavlik Protect provides everything your organization needs for an effective patch management strategy, including OS, virtualization, and third-party application patching. Console, server or workstation.

- Patch easily across all environments
- Decrease risk; boost security and compliance
- Simplify and automate patch management to save time, effort, and cost

Shavlik Patch – Eliminate known vulnerabilities, keeps systems up-to-date, and always current. Shavlik Patch® for Microsoft System Center adds non-Microsoft third-party patch to Microsoft System Center Configuration Manager (SCCM) to maximize your investment in System Center and to reduce risks from unpatched third-party applications.

- Go beyond OS patching to reduce application security risks
- Maximize your Microsoft system center investment
- Significantly reduce IT effort and cost in deploying and managing application updates
