ShoreTel IP930D Starter Kit Promotion

March 3, 2014-June 30, 2014

The ShoreTel IP 930D is a cordless phone solution ideally suited for those needing a full telephony feature set with in-building mobility. IP 930D users can step away from their desk without losing the ability to manage incoming inquiries or monitor shared extensions. The IP 930D delivers generous talk time (12 hours) and standby times (5 days) and feature-parity with the ShoreTel IP 230 desk phone.

All existing customers who purchase IP 930D starter kits will get one free starter kit for each one they purchase, effectively receiving a 50% discount. There are no limits on the number of starter kits purchased; each one purchased qualifies for an additional one to be included at no charge.

New customers are entitled to one free IP 930D starter kit with the purchase of their ShoreTel UC system. There is a limit of one free starter kit with each new customer's initial order, and both SBE 100 and Enterprise new system purchases qualify for this promotion.

However, new customers who also purchase IP 930D starter kits with their initial order are entitled to the same buy one, get one free offer as existing customers.

Standard IP930D part number SKU 10384
