Attention Managed Service Providers
Are you interested in a model that offers residual income, flexible user counts, and high margins? Do you have an existing MSP practice? Did you know Trend Micro offers a MSP program? Please contact our Managed Services Specialist at 800-456-8000 x67157 or kyle.fenske@ingrammicro.com.   Also be sure to check out the Trend Micro Cloud Playbook.

EMV Transition: Stay Secure with Trend Micro

If you're a business owner, you should know the government is changing the way we process credit cards in the United States to cut down on credit card fraud through Point-of-Sale transactions. EMV is coming,

but it's only part of the solution. Customer data travels through the network to become authorized, so a multi-layered approach to secure the vulnerabilities throughout the network is vital—not only for data security, but for PCI DSS compliance regulations. If you want to learn more, contact Caitlin Schneider at 800-456-8000 x67713 or Caitlin.Schneider@ingrammicro.com for information on our reoccurring live webinars running every Wednesday at 2pm EST/11am PST.

NEW Deep Security 9.6: Now integrates with VMware vSphere 6!

Trend Micro Deep Security—available as software or as-a-service—is designed to protect your data center and cloud workloads from data breaches and business disruptions. Deep Security helps you achieve compliance by closing gaps in protection efficiently and economically across virtual and cloud environments. Get the latest version of Deep Security today and start realizing these new benefits:

- Integration with VMware vSphere 6
- Deep Security for SAP module
- Integration with IBM QRadar (SIEM)
- Expanded platform support
- Extended active directory support
- Enhanced security module usage reporting
